| • Home | View Domain listing |
| • View Invoice / Receipt | View invoices and receipts of the domain name related service |
| • View Whois Information | View all the Information for the domain name |
| • Modify Domain Information | Modify Contact Information of the domain name |
| • Add DN Host | Add the host for the domain name |
| • Modify DN Host | Modify the host for the domain name |
| • Delete DN Host | Delete the host for the domain name |
| • Modify DNS | User can modify the DNS for your domain to any other external DNS |
| • Change Contract Type | Change your domain which belongs to old contract to new contract. |
| • Re-Registration Application | If the domain name is in 'incomplete' status of re-registration, process this application and send us required document. |
| • Request Domain Authorization code | If you want to let another service partner or registrar manage your domain, you will have to provide a specific code (we call it Authorisation Code) to the new service partner / registrar. This code is very important for HKDNR (the registrar) to verify that you have authorised this company to manage your domain and that this new service partner can access to your registration and contact information of your domain. |
| • DNSSEC | Modify DNSSEC status and update DS records |

This service is free of charge for domain name under 'new' contract. If the domain name is under 'old' contract, this service is subject to a fee of HK\$ 200.00. You can check the contract type of the domain name by viewing WHOIS information.

The change effects immediately on our system or if under old agreement the day after we receive payment and/or document (if required). Please note that it will usually take several hours for the change to propagate to all DNS servers on the Internet. You may therefore see the change several hours more.

Please note that if you are modifying .hk Chinese domain, the .香港 Chinese domain of the same string will also be changed.

As required by Internet guidelines (RFCs 191 & 2182), at least two DNS (Domain Name System) servers, one primary and at least, one secondary DNS server, are needed. The name servers must be continuously connected on the internet. If you do not have your own dedicated name server, a local ISPs can provide name services. However, such services are normally not free.

To use our domain parking, please fill in the name server available at below:

1.NS5.HKDNR.NET.HK

2.NS6.HKDNR.NET.HK
